
(a) The forest
(b) After eliminating 3
star–triangle + parallel
eliminate 3
$\lambda_2 = \lambda_3 = \lambda_4 = 0, \qquad \lambda_B = -\lambda_1 - \lambda_A$
star–triangle + parallel
eliminate 4
(c) After eliminating 4
(d) After eliminating 2
(e) The unit resistor
star–triangle + parallel
eliminate 2
series + parallel
eliminate 1
$t^{\mathrm{red}}_{AB} = 1$
$y^{\mathrm{red}}_{AB} = \lambda_A + \dfrac{t^{\mathrm{red}}_{1B}}{t^{\mathrm{red}}_{1A} + t^{\mathrm{red}}_{1B}}\,\lambda_1$
