(a) Series–parallel move

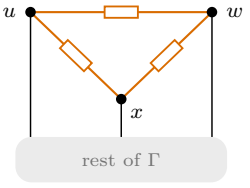

$$= \int_0^1 dr_1 \int_0^1 dr_2 \; r_2 \, e^{-\lambda_{v,+\dot{a}}(r_1 z_{vu} + (1-r_1) z_{vw})^{+\dot{a}}} \left(\lambda_v \, y^{\mathrm{red}}_{uw}\right)$$

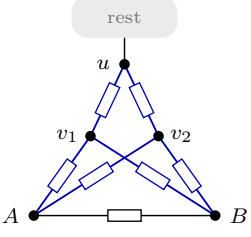

(b) Star–triangle move

$$= \int_0^1 dr_1 \int_0^1 dr_2 \; r_1 r_2 \left(y^{\mathrm{red}}_{ux} \, y^{\mathrm{red}}_{wx}\right)$$

(c) Star–triangle moves at two leaves

$$= \int_0^1 dr_1 \int_0^1 dr_2 \int_{r_3+r_4<1} dr_3 \, dr_4 \, (r_1 - r_2)(1 - r_3 - r_4) \left(y^{\mathrm{red}}_{uA} y^{\mathrm{red}}_{AB}\right) \left(y^{\mathrm{red}}_{uB} y^{\mathrm{red}}_{AB}\right)$$
